

Provident Fund Scheme for Workers in the Public Services

Plans for Application of Contributions

The Provident Fund Scheme for Workers in the Public Services is a retirement benefits plan designed for workers in the Public Services. As a Scheme member, you can set up your own investment portfolio with the Plans for Application of Contributions provided by the Scheme, and thus participate in the investment of your retirement plan.

This leaflet provides general information of the Plans for Application of Contributions under the Provident Fund Scheme. It enables you to gain better understanding of retirement investments under the Scheme.

Investing for Retirement.

Unlike personal investments, retirement investments generally have a very long time horizon. The objective is to be able to accumulate assets for a retirement lifestyle that suits your individual needs. Hence, having a clear understanding of your investment strategy and ensuring its implementation is the key to success in retirement investments.

1. Assess your Personal Risk Tolerance

Before setting up your investment portfolio, you should first define your investment objective and risk tolerance, in accordance with your own personal factors, and thus set up a suitable investment strategy.

You can assess your own risk tolerance by completing the Investor Risk Profiling Questionnaire.

2. Set up your Investment Portfolio

The Scheme currently provides the Plans for Application of Contributions with different risk/return characteristics. Combining the Plans for Application of Contributions at 1% increment you can obtain various portfolios that widely span the risk spectrum. You can establish from these portfolios the one that best meets your investment strategy.

The basic information of each of the Plans for Application of Contributions under the Provident Fund Scheme, such as the investment objective, the risk profile and the total annual fee, etc. is provided in attachment for your easy reference.

3. Review your portfolio regularly

You should review your investment objective at different life stages or according to changes of your personal situations. And, when necessary, you may consider to adjust your investment portfolio.

Reminder: Retirement investment is long-term. Only with changes in factors such as personal situations, years to retirement or risk tolerance, should members make appropriate switching. Changes of investment strategies should be avoided especially when the market is extremely volatile, as this may lead members to "buy high and sell low" and to suffer from losses.
